

$$\Phi_R(s) = \frac{KG_1(s)G_2(s)}{1+KG_1(s)G_2(s)}$$

跟踪通道：指令到输出

$$\Phi_N(s) = \frac{G_2(s)}{1+KG_1(s)G_2(s)}$$

扰动通道：海浪到输出

$$y(t) = y_R(t) + y_N(t)$$

对阶跃扰动, $C_N(\infty) \approx \frac{0.625}{K}$
