

静态误差系数

$$K_p = \lim_{s \rightarrow 0} G(s)H(s)$$

$$K_v = \lim_{s \rightarrow 0} sG(s)H(s)$$

$$K_a = \lim_{s \rightarrow 0} s^2 G(s)H(s)$$

单位输入误差

step: $e_{ss} = 1/(1 + K_p)$

ramp: $e_{ss} = 1/K_v$

acceleration: $e_{ss} = 1/K_a$
