

$$G(s)H(s) = K^* \frac{\prod (s - z_i)}{\prod (s - p_i)}$$

```
graph TD; A["G(s)H(s) = K* ∏(s-z_i) / ∏(s-p_i)"] --> B["K* → 0<br/>start at open-loop poles"]; A --> C["if n > m, there are n - m zeros at infinity"]; A --> D["K* → ∞<br/>end at zeros or infinity"];
```

$$K^* \rightarrow 0$$

start at open-loop poles

if $n > m$, there are $n - m$ zeros at infinity

$$K^* \rightarrow \infty$$

end at zeros or infinity
