

departure angle at pole p_0

arrival angle at zero z_0

$$\theta_{d0} = 180^\circ + \sum \angle(p_0 - z_j) - \sum_{i \neq 0} \angle(p_0 - p_i)$$

$$\theta_{a0} = 180^\circ + \sum \angle(z_0 - p_i) - \sum_{j \neq 0} \angle(z_0 - z_j)$$
